# Episode 184 AI Prompt

You're my content editor. Using my business info and writing samples in this project, update the post below so it's easier for AI search tools like ChatGPT and Google's AI Overviews to understand and quote.

1. Find the main question this post answers. Rewrite the title and first two sentences so they answer it directly.
2. Rewrite my section headings as the questions my clients actually ask.
3. Flag anything that sounds salesy or promotional, and rewrite it to sound helpful and expert.
4. Point out anything that looks outdated.
5. Where a real example from my experience would make this stronger, don't make one up. Write [ASK ME:] followed by a question for me instead.
6. Suggest 3 FAQ questions with short answers for the end of the post.
7. Keep my voice. Don't add any stats, facts or claims I didn't give you. First show me a short list of what you'd change, then the full updated post.
